Let us entertain you

Jamo S 506

With more than 210 watts of music power the Jamo S506 offers excellent value for money without compromises in design or sound. Give these speakers a listen and compare them to our competitors' products – we promise you will be surprised!

The S506 has a wave-guide-coupled 1" tweeter, and 2 x 6½" midrange/woofers ensure strong and clear vocals and instruments as well as stromg, well-defined bass.
The 2 midrange/woofers are mounted in separate, fully isolated enclosures in order to minimize negative interferences, and further the individual tuning of each of the cavities eases the load of the amplifier and result in a more tunefull, low-distortion bass.
A very thick baffle provides a solid foundation for the best possible performance from the 2 carefully engineered mid-woofers, annd further increases the stiffness of the already very strong enclosure.

The easily adjustable spikes ensure that the speakers always stand securely, and the good mechanical contact to the listening-room-floor enhances the acoustic experience.
The S506 is fully equipped for optional bi-wiring and bi-amplification, and will thus allow the enthusiast to "tweak" the sound-performance to his or hers needs.

In closing we should also mention that the S506 comes with removable front fabric grilles.
You have the choice of leaving them on or off, but, just as importantly, it also show that we have nothing to hide with these beauties….quite the opposite!

Specifications	**S 506**
System	2-way bassreflex
Woofer (mm/in)	2 x 165 / 6½
Tweeter	25 / 1
Power W long/shortterm	130 / 180
Frequency Range (Hz)	45-20.000
Sensitivity (db/2.8V/1m)	89
Impedance (Ohm)	6
Weight (kg/lb)	15,2 / 33,1
Dimensions (mm) HxWxD	1000x195x301
Dimensions (in) HxWxD	39.4x7.7x11.9
